

# Rittal – KVM technology

Perfect Server Administration

# PERFECT SERVER ADMINISTRATION WITH KVM TECHNOLOGY FROM RITTAL

Rittal KVM (Keyboard Video Mouse) switches provide the perfect answer for every customer requirement, from **stand-alone solutions** for 8 to 32 servers, to **complex multi-user systems** for data centre applications with up to 2048 computers. The location of these computers is irrelevant. They may be accessed and administered directly, either **locally** or **worldwide via TCP/IP networks**.

Rittal KVM technology can be adapted to suit the most diverse customer requirements.

## Simple server administration via OSD

Every system, from the SSC view (SSC = Server Switch Control) to the SSC premium KVM modular concept, features a uniform operating concept with clearly structured OSD (On-Screen Display) or programmable hotkeys, allowing users to find their way intuitively around the full range of SSC products, and eliminating the need for laborious studying of the manual.

## User-friendly design for comfortable working

Thanks to the exceptional transmission quality of analog systems, the display quality is as good as on-site in the data centre, and it is therefore irrelevant whether the servers are accessed directly on the rack or via a remote console using Cat 5 cables. All systems, with the exception of IP access, support real time operation.

All SSC systems have at least one password protection, effectively preventing unauthorised access to the servers.

The Rittal "Enterprise Solution", the SSC premium KVM modular concept, boasts extensive authentication and authorisation mechanisms, thanks to a sophisticated system of user

and rights administration. Up to 128 users and connected servers may be conveniently divided into user groups with different access rights, making administration far simpler. Thanks to the high-availability concept with optional redundant power supply and connection of the SSC premium 8/32 to external user administration systems (such as LDAP/Active Directory), the user management system of the SSC premium KVM system may be transferred independently of the operating system and hardware. This will reduce administration costs in the data centre significantly.

**Complete site management – Remote maintenance**

As well as supporting the administration of hard-to-reach servers, optional control of the power supply to the servers (up to 3x IEC 320 devices EN 60 320 C13 per server) and the connection of additional network hardware such as switches and hubs with a serial management port means that large parts of the infrastructure may also be maintained remotely with the SSC premium.

**High packaging density for a large number of servers**

By using standardised Cat 5 cabling, up to 32 server ports may be implemented in 1 U. With cable lengths of up to 300 m, almost any conceivable structure can be achieved in the server room. By cascading several SSC premiums, up to 2048 servers may be connected to the SSC premium KVM modular system.

**Extendible “step by step” – for a high level of investment protection**

A modern data centre is not static; it thrives on changes and expansion.

Only a modular KVM system is capable of adapting effortlessly to changing requirements. The open, manufacturer-independent platform of the SSC premium KVM system is able to outlive several generations of servers, and remains extendible – even years later.

**Central server management worldwide – with KVM-over-IP solutions**

Modern IP technology means that the servers connected to the SSC premium can be accessed from any location. Rittal offers the SSC console IP with integral Web interface and Java client. A laptop is all you need for administration purposes. Naturally, high security standards also apply (encryption of SSL Web interfaces with 128 bit). On request, the video and/or keyboard mouse channel may be encrypted, to protect the signals from unauthorised reading on the IP network.

## Monitor/keyboard unit

## SSC view

## SSC compact

## SSC premium

### Compact administration

The compact 1 U monitor/keyboard unit from Rittal ensures reliable, space-saving, on-site server administration. The 1 U console is easily combined with the Rittal KVM switch series SSC view, allowing access to 8 or 32 servers respectively.

- 15" or 17" TFT display
- Various keyboard layouts available
- Variants with trackball or touchpad
- VGA connection
- Compatible with all Rittal SSC KVM systems

### Full control in 1 U

The SSC view line, with the Rittal monitor/keyboard unit, forms a compact console/switching solution which only occupies 1 U in the rack. The Rittal solution may be combined as required between a choice of two different console types with 15" and 17" TFT display, offering country-specific keyboard layouts and two different KVM switches. It is easily upgraded at a later date, or exchanged for a more powerful system.

- Compact stand-alone console/switching solution
- The SSC view utilises the space behind the monitor/keyboard drawer
- Supplied with power via the integral power pack
- With the 8-way KVM switches, the servers are connected using standard VGA/PS/2 cables

### The compact class

The SSC compact offers top performance in a small space at an inexpensive price. The integral long-range power pack makes it ideally suited for stand-alone operation or as an upgrade to an existing installation. With the SSC compact 8, standard VGA cables locked to the PS/2 sockets ensure reliable operation. With the SSC compact 32 Cat, connection to the computer is made using Cat 5 cables and an SSC converter.

- Space-saving ultra-compact server administration in stand-alone mode
- Option of cascading or retrofitting (SSC compact 32 Cat)
- For connecting the computers, there are two variants available with VGA/PS/2 and USB connection

### Modular and future-proof

The modular SSC premium is the first choice for medium to large size installations, or in cases where modern features such as multi-user and/or IP access (KVM-over-IP) are required.

Almost all system requirements may be met with just a few system components. The modularity ensures that this KVM is future-proof, as the SSC premium system is easily expanded to keep pace with your server installation as it grows.

- Highly integrated KVM matrix based on Cat technology
- New switching technology which adapts flexibly to your future requirements via cascading.
- Multi-user operation is supported, both locally and via IP access (KVM-over-IP).
- Three different converter types support the operation of a wide range of server platforms.

### OSD

All Rittal SSC KVM systems have an easy-to-use OSD menu via which server selection and other user-friendly features such as autoscan, autoskip and, in the case of the SSC premium, a comprehensive rights administration system for users and connected servers, may be implemented.

The "SSC premium view" toolware included with the supply of the SSC premium 8/32 provides a user-friendly graphical interface from which the entire configuration may be implemented online via TCP/IP. Configuration includes the network settings, the creation of users and servers, and their classification into various different groups.

A comprehensive range of network functions are also supported:

- Setup of authentication via LDAP, Active Directory
- Syslog configuration
- Firmware updates
- Protect & restore the system configuration

SSC premium view software

SSC console IP Web interface

Pictures are similar models.

### Monitor/keyboard unit, 1 U with 15" and 17" TFT display

This compact 1 U console in a 2-colour design was developed for secure, space-saving server administration. In order to access other servers, this monitor/keyboard unit is easily combined with the Rittal KVM switches SSC view 8 and SSC view 32 Cat. This makes it possible to connect up to 32 servers to one unit (1 U high). The peculiarity of this compact solution is that a 482.6 mm (19") keyboard including number pad and keypad may be integrated, in spite of its small size. The minimal depth of the unit, at just 510 mm (680 mm with 17" TFT display, each without SSC extension), makes it suitable for installation in enclosures of depth from 800 mm. The installation kits supplied allow it to be adapted to an existing difference between levels of 680 – 850 mm for the 482.6 mm (19") levels.

When closed, the drawer can be locked for protection against unauthorised operation.

In order to prevent heat accumulation when folded, the backlight is deactivated automatically.

The unit has a German keyboard layout. Versions in English and French, as well as other country- and customer-specific versions available on request.

#### Supply includes:

Complete monitor/keyboard unit in RAL 7035 (light grey) or RAL 9005 (black) with design components and handle in RAL 9006 (silver) including assembly parts and all the required connection cables (approx. 1.6 m) for:

- Power supply
- VGA video
- Keyboard connection (PS/2 and USB)
- Mouse connection (touchpad or trackball, PS/2, USB).

#### Note:

### SSC view 8/SSC view 32 Cat 8 or 32-port KVM switch for monitor/keyboard unit, see page 5.

This compact SSC view optionally extends the Rittal monitor/keyboard unit to include the function of an 8 or 32-port KVM switch, without requiring an additional U in the server rack for mounting. The switch may be mounted behind the existing monitor unit, and voltage is supplied via the power pack integrated into the drawer. The SSC view has a password-protected OSD menu, but server selection may also be made via hotkeys.

The SSC view 32 Cat may be extended (cascaded) with up to three SSC compact 32 Cat if more than 32 servers need to be administered. In this way, up to 125 servers may be administered by one user in the final configuration.

This means that the Rittal SSC switching system is able to grow flexibly in line with requirements. With the SSC view 32 Cat, the computers are connected via Cat cables and SSC Connect (PS/2 or USB). In this way, the signals for video, keyboard and mouse are transmitted via a shared cable. This cuts down on cabling work considerably, particularly in fully populated racks. One SSC Connect is required for each computer. Processor-controlled keyboard and mouse emulation for each channel ensures fault-free booting and reliable switching between the connected computers.

**Connection example** see page 14.

### SSC compact 8/ SSC compact 32 Cat

#### Economy 8/32-port KVM switch

These ultra-compact KVM switches for 482.6 mm (19") mounting facilitate space-saving server administration in any IT rack. The SSC has a password-protected OSD menu for server selection, but selection may also be made via hotkeys. The SSC compact 32 Cat may be extended (cascaded) with up to three additional SSC compact 32 Cat if more than 32 servers need to be administered. In this way, up to 125 servers may be administered by one user in the final configuration.

The Rittal SSC switching system grows flexibly with your requirements. With the SSC compact 32 Cat, the computers are connected via Cat cables and SSC Connect. The signals for video, keyboard and mouse are transmitted via a shared cable. This cuts down on cabling work considerably, particularly in fully populated racks. Processor-controlled keyboard and mouse emulation for each channel ensures fault-free booting and reliable switching between the connected computers.

## KVM switch

### SSC premium 2/16, 4/32, 8/32

#### Highly integrated KVM matrix based on Cat technology

With the SSC premium, Rittal offers a KVM switching technology which can adapt to your future requirements. By using Cat technology (i.e. transmission of signals for keyboard, video and mouse via a Cat cable), the required cabling work inside the rack may be reduced considerably; what is more, highly compact 1 U systems with up to 32 server ports are supported. The SSC premium are full-matrix switches which support simultaneous, unrestricted access to the chosen computer system for each of the connected users. Various console types are available for administration purposes, via which all computer systems may be conveniently activated via OSD or hotkeys. By separating the hardware switch and operating console, the systems may be adapted to any required computer environment. On the computer side, conversion to standard PC interfaces is achieved via separate converters which optimise all signals (keyboard, video, mouse) for transmission via the Cat cable. Needless to say, all SSC premium have comprehensive configuration and management functions, and additional functions may be added in the future via flash upgradability. The full matrix may be flexibly extended via cascading with type-identical SSC premiums in up to 3 levels. The structure of the cascaded system right down to the individual computer level may be graphically depicted in a tree structure, thus facilitating an overview of the entire system. The SSC Power Control (DK 7552.420) also facilitates control of the Rittal 8-way PSM modules (DK 7856.201) or 8-way Rittal PCU (DK 7200.001) with the SSC premium. In this way, any of the connected servers may be hard-rebooted if necessary – worldwide!

To this end, up to 3 IEC 320 sockets in the SSC premium are allocated to each individual server.

**Connection example** see page 14.

#### Material:

Sheet steel

#### Colour:

Spray-finished in RAL 7035

#### Protection category:

IP 30

#### Also required:

SSC converter (depending on the number of computers) and at least one operator console, see page 10/12.

Mains connection cable (DK 7200.210), see page 13.

By cascading type-identical SSC premiums, the maximum number of administrable computers may be flexibly extended.

## KVM switch

### Console local

#### for SSC premium

- For installation in
- 482.6 mm (19")
  - at the rear of 15"/17" monitor unit (9050.XXX/9055.XXX)

This local console forms the link between the keyboard, monitor, mouse (or the Rittal monitor/keyboard unit) and the SSC premium. Via the console, the computer systems connected to the switch may be conveniently selected and administered using the OSD. The signals are converted to Cat cables with a length of up to 10 m and forwarded to the KVM matrix. Power supply is optionally via the Rittal monitor/keyboard unit or, in the case of stand-alone 482.6 mm (19") installation, via the SSC Power Pack (DK 7552.220). Supplied complete with assembly parts.

#### Technical specifications:

Video resolution: Max. 1920 x 1440 @ 75 Hz (depending on the cable length)

Video bandwidth: 250 Mhz

Voltage supply: 12 V DC (from monitor/keyboard unit)

or via SSC Power Pack DK 7552.220

Dimensions:

W x H x D 325 x 44 x 85 mm (stand-alone)

W x H x D 465 x 44 x 140 mm (built into 482.6 mm (19"))

Type	Packs of	Model No. DK
Console local	1	7552.200

#### Connections (jack):

PS/2 (keyboard and mouse)  
 USB-A (keyboard/mouse)  
 HD15 (VGA video RGB & Sync.)  
 RJ 45 (KVM matrix connection)  
 Mini-DIN 4 (12 V power supply)

#### Also required:

Only for 482.6 mm (19") installation without monitor/keyboard unit:  
 SSC Power Pack DK 7552.220, see page 12,  
 Cat 5 patch cable, see page 12.

### Console Cat 5

#### for SSC premium

This remote console forms the link between the keyboard, monitor, mouse and the SSC premium. Via the console, the computer systems connected to the switch may be conveniently selected and administered using the OSD. The signals are forwarded via Cat cable, depending on the cable quality up to 300 m, via the KVM matrix to the connected computers. Additionally, if required, 2 local PCs and the corresponding converters may be connected to the console via Cat cables. Switchover to these two computers is achieved via keys on the front. The console is designed as a compact desktop enclosure with integral wide-range power pack (482.6 mm (19") versions on request).

#### Technical specifications:

Video resolution: Max. 1920 x 1440 @ 75 Hz (depending on the cable length)

Video bandwidth: 250 Mhz

Power supply (internal power pack):

100 – 280 V, 50 – 60 Hz/0.2 A

Dimensions: W x H x D 270 x 44 x 220 mm

Type	Packs of	Model No. DK
Console Cat 5	1	7552.212

#### Connections (jack):

PS/2 (keyboard and mouse)  
 USB-A (keyboard/mouse)  
 SUB-HD15 (VGA video RGB & Sync.)  
 2 x Cat (RJ 45) to connect 2 local PCs via SSC converters (VGA, PS/2 or USB)  
 RJ 45 (KVM matrix connection)  
 IEC 60 320 C14 (power supply)  
 Mini-DIN 4 (redundant power supply)

#### Also required:

Cat 5 patch cable, see page 12,  
 SSC converter for local PCs, see page 11.  
 Mains connection cable (e.g. DK 7200.210).

### Console IP

#### for SSC premium (KVM-over-IP)

With the IP remote console, computers connected to the KVM matrix may be accessed via any given TCP/IP network. The Console IP is a hardware solution requiring no software installation on the target computer. This ensures independence from the type and status of the operating system used, and facilitates remote monitoring of the computers at BIOS level even during the boot phase. Precise operation of the remote computer can only be achieved via the original mouse pointer. A browser-based Web interface is available for configuration of the SSC Console IP. With the system operational, the target computers may be accessed at any time via Web browsers and Java applets (irrespective of the operating system), or if Java is not supported, via optimised client software for common operating systems. This client has extended functions (e.g. a setup mode) and can be used throughout the company without restriction. Installation of the client software is not necessary, as it may also be launched e.g. from a USB stick. In addition to remote access via IP, the SSC Console IP also has an integral local console port (competing with IP access) for connecting the keyboard, mouse and monitor.

With the Rittal KVM-over-IP solution, security is a top priority. For this reason, access to the console is additionally password-protected. KVM access to the Web interface may be encrypted via HTTPS (SSL 128-bit). This may optionally encrypt the control channel only, or additionally the video channel and/or the keyboard/mouse channel. In order to further increase protection from failure, the SSC console IP may also be extended with a redundant power pack via the SSC Power Pack (DK 7552.220).

Type	Packs of	Model No. DK
Console IP	1	<b>7552.214</b>

#### Note:

The supply includes the client software for current Windows operating systems (MS Windows 2000, XP Professional, 2003 Server) as well as Linux Distribution (RedHat, Suse) in German and English.

#### Technical specifications:

Video resolution: max. 1280 x 1024 @ 75 Hz  
 Network: 10/100 MBit/s  
 Power pack: 100 – 240 V AC, 50/60 Hz  
 Dimensions:  
 W x H x D approx. 440 x 44 x 380 mm

#### Connections (jack):

PS/2 (keyboard and mouse)  
 SUB-HD15 (VGA video, RGB and Sync.)  
 RJ45 (KVM matrix connection)  
 RJ 45 (Ethernet)  
 Sub-D (RS232)  
 IEC 60 320 C14 (power supply)  
 Mini-DIN 4 (redundant power supply)

#### Also required:

Mains connection cable (DK 7200.210), see page 13.  
 Cat 5 patch cable, see page 12.

### SSC converter

#### for SSC premium

The SSC converters convert the signals for keyboard, video and mouse from the connected computer to the CAT cable.

There is a choice of three different variants for connecting a PC with PS/2 or USB ports, and a separate version for use with SUN computers with a USB port. One converter is required for each computer. Every SSC converter has a unique identification number (Unique-ID). When the converter is connected to a server, it can be located at any time in the overall system (even in the event of rewiring), without needing to know the physical connection. This is the main difference from simple converter solutions.

SSC converter	Packs of	Model No. DK
PS/2	1	<b>7552.201</b>
USB	1	<b>7552.202</b>
SUN-USB (German)	1	<b>7552.203</b>
SUN-USB (US English)	1	<b>7552.204</b>

### SSC converter VT100 (RS232)

#### for SSC premium

This SSC adaptor makes it possible to integrate active network components (such as an Ethernet switch) with a serial management port which support the VT100 terminal mode into the SSC premium KVM system and administer them remotely. The serial output signals (ASCII character set) are converted into a video signal which is transmitted via the KVM matrix. Conversely, incoming keyboard inputs are reconverted to serial.

#### Connections:

Sub-D 9-pole (RS232),  
RJ 45 (KVM matrix connection),  
Mini-DIN 4 (power supply).

	Packs of	Model No. DK
SSC converter VT100	1	<b>7552.205</b>

#### Supply includes:

Power pack (100 – 240 V, 50/60 Hz/s), secondary, 12 V/0.7 A.  
Mains connection cable (DK 7200.210), see page 13.

#### Also required:

Cat 5 patch cable,  
see page 12.

### Cat 5 patch cable

Flexible, preconfigured Cat 5 STP patch cable with shielded RJ 45 connectors for connecting the SSC Converter and SSC Console to the SSC premium switch. The cables are connected 1 : 1 wired to AT&T 258A/T568B and comply with ISO/IEC 11801, UL E151955.

#### Colour:

Grey

Length (m)	Packs of	Model No. DK
0.5	4	<b>7320.470</b>
2	4	<b>7320.472</b>
5	4	<b>7320.475</b>
10	1	<b>7320.481</b>
15	1	<b>7320.485</b>

### SSC Power Control

#### for SSC premium

With this adaptor, the Power Control Unit socket strips (DK 7200.001) and the active PSM module (DK 7856.201) may be switched individually or in pairs (for servers with redundant power supply). Control is via the OSD integrated into the SSC premium.

Up to 8 PSM and/or PCU modules may be switched (max. 64 EN 60 320 C13 slots).

Up to 3 sockets may be allocated per server.

This facilitates a hard reboot of each individual server via the connected user consoles, also via IP networks in conjunction with the SSC Console IP.

#### Note:

The connection cable between the SSC premium and the SSC Power Control with a length of 2.5 m is included with the supply.

	Packs of	Model No. DK
SSC Power Control	1	<b>7552.420</b>

#### Also required:

Mounting module (DK 7320.450),  
power pack (DK 7201.210),  
mains cable (DK 7200.210),  
at least 1 active PSM/PCU module,  
see page 13 or Cat. 31, page 83.  
Cat 5 patch cable,  
see page 12.

### SSC Power Pack

In order to increase reliability, we recommend configuring a redundant power supply to the SSC premium and the connected user consoles.

This compact power pack (AC: 100 – 240 V, 50/60 Hz, DC: 12 V/5 A) with IEC 320 socket (EN 60 320) and Mini-DIN 4 connector is ideal for this purpose. Should the first power supply of the internal power pack fail, the functionality of the KVM switch is maintained.

#### Supply includes:

Assembly parts.

SSC	Packs of	Model No. DK
SSC Power Pack	1	<b>7552.220</b>

#### Also required:

Connection cable power pack,  
see page 13.

## Rittal Power Control Unit (PCU)/Connection accessories

### Rittal Power Control Unit (PCU) 1 U, 8-way, individually switchable

The 1 U PCU socket strip has 8 current outlets with IEC 60 320 C13 slots. Each of the 8 slots is individually switchable (via the CMC-TC system). Furthermore, a current indicator, circuit display is integrated into the module. The socket strip may be installed on the enclosure frame or in the 482.6 mm (19") section (1 U) of a rack. Suitable for use with 230 V AC/50 Hz mains voltage.

#### Operate the socket strip without CMC-TC:

For operation of the socket strip, power pack DK 7201.210 and a connection cable (see page 13) are needed. Up to 4 socket strips may be operated with one power pack.

Available functions: Current display on the module, automatic selective activation.

Design	Model No. DK
8-way	7200.001

#### Description of functions:

- 2-digit local LED 7-segment current display on the PCU. Legibility rotates according to the installation position.
- Alarm messages are indicated via a flashing 7-segment display.
- PCUs may be combined via the bus system, thereby enabling selective activation.
- In conjunction with the CMC-TC, the 8 individual current outlets of the PCUs may be activated and deactivated individually via HTTP and SNMP.
- Remote administration of the power supply.
- 8 IEC 60 320 C13 slots per PCU.

#### Material:

Aluminium section with plastic cover

#### Supply includes:

- 1 socket strip PCU 1 U (max. 10 A per socket strip),
- 1 bus cable,
- 1 infeed cable 24 V DC,
- 1 adaptor for power pack 24 V DC,
- 1 connector for power supply.

#### Also required:

A separate power pack (100 – 240 V AC/24 V DC) is required for stand-alone operation without CMC-TC (DK 7201.210) and the relevant connection cables, see page 13.

Switching function with SSC premium:

For each SSC switch one SSC Power Control (DK 7552.420), see page 12, is required!

### Connection cable/extension

The cable is used to connect to:

- CMC-TC Master II
- 24 V power pack for PU II
- Active fan unit for TE
- Climate unit (connected fan)
- Voltage monitor
- Voltage expansion unit

#### Technical specifications:

PVC cable, 3-pole, with IEC cable coupling (non-heating appliances) with contact protection CEE22.

#### Supply includes:

1 connection cable, length at least 1.80 m.

Country version	Voltage Volt	Model No. DK
D/F/B	230	7200.210
GB	230	7200.211 <sup>1)</sup>
CH	230	7200.213 <sup>1)</sup>
USA/CDN	230/115	7200.214 <sup>1)</sup>
IEC 320 extension	230/115	7200.215

<sup>1)</sup> Extended delivery times.

### CPU cable

Combination connection cable between SSC view 8 and the individual servers, each with 2 HD 15 connectors for video, plus lockable PS/2 connectors at both ends for the keyboard and mouse, colour-coded.

Cable length	Model No. DK
2 m	7552.120
4 m	7552.140

# Monitoring

## Connection example for KVM switches

### Connection example SSC view 8

see page 6  
 (behind monitor/keyboard unit, 1 U)  
 Compact switching for up to 8 servers.

### Connection example SSC view 32 cat

see page 6  
 (behind monitor/keyboard unit, 1 U) administer 32 servers in 1 U.  
 The most powerful 1 U console/switch solution.

### Connection example SSC compact 8

see page 7  
 Economy KVM technology. Ideal for retrofitting into existing installations.

### Connection example SSC compact 32 cat

see page 7  
 1 user KVM for 32 servers.  
 Extendible up to a maximum of 125 connected servers.

### Connection example SSC premium 8/32

see page 8  
 Modular KVM for data centres. Up to 8 users may access the connected servers in parallel and independently from one another. Remote access via "KVM over IP" is also supported. Furthermore, the Rittal sockets may also be switched via the OSD of the SSC premium. This facilitates a "hard-reboot" of the servers from anywhere in the world.

# All in all – solutions from Rittal

**Industrial Enclosures**

**Power Distribution**

**Electronic Packaging**

**System Climate Control**

**IT Solutions**

Network enclosures · Server racks · KVM technology  
Telco racks · Office solutions · Distributor racks  
Wall-mounted enclosures · RimatriX5 · Power management  
concepts · IT cooling · Monitoring · Security · Services · Kiosks

**Communication Systems**

Rittal has one of the largest ranges of enclosures available for immediate delivery. However, Rittal also supplies integrated solutions – up to Level 4. This comprises mechanical installation, power supply, electronic components, climate control and central monitoring. For all of your requirements.

Fully assembled and functional. Wherever in the world you develop and implement solutions for yourself and your customers, we are close at hand. The global alliance between production, distribution and service guarantees closeness to the customer. Worldwide!
